European nations are becoming exceedingly liberal. At first they were going to deny the United States both benefits and absolution because it wickedly refused to come into the league. Now they are offering us Armenia and no questions asked if we will only take it off their hands. Wish somebody would close the doors and windows for a while.

BOURBONISM IN MISSOURI.

Bourbonism had its hour of revenge when the democracy of Missouri met in state convention the other day and independent statesmanship, of which the world stands so much in need, was made to ascend the cross of crucifixion. If men were thinking, speaking and writing these days only from the standpoint of partisan politics, the the humiliation of Senator Reed would be a cause for celebration on the part of those whose sympathies are with the opposite party; for it means the certain defeat of democracy in Mis-

But the matter transcends in importance any mere partisan consideration, and few there are who feel at all inclined to take a mere partisan view of events that vitally affect the great underlying principles of our government. The Missouri event was such a one.

What was Reed's offense?

The question is appropos. The historian will delve into it, and posterity will read what the historian writes with only a blush of shame for bourbonism and quickened admiration for Reed. For, shorn of persiflage and partisan dogma, the offense was that he had the courage to break with party when that party broke faith with his country's traditions and ideals. And for that he was broke.

Within the experience of this generation the time will come when all will understand the great service performed for America by the so-called "willful men." who dared to oppose the autocratic will of one victously determined to wreck American institutions upon the sinister altar of international intrigue. Prominent among the twelve was Reed, of Missouri, it may be that prior to 1919 the men who opposed the great un-American document offered in that year had not carned for themselves the affectionate regard of their country; had failed to measure up as statesmen of singular attainments. That is as it may be, and we here make no preionse of paying them tribute for what had gone

But in that year, when these men took their political lives in their hands and responded to the dictates of conscience rather than play the political cad by cringing 'neath the party lash, they proved themselves beyond all question. Let those who charge that they were animated by ulterior motives supply satisfactory motives for such action. What could it have been? All are agreed that they could not hope to curry favor with their constituents by such acts. It is in the record that they defied the holders of the money bags in order to do as they did. No argument is required to prove that they had nothing to gain in the way of patronage and distinction from the autocratic administration they defied.

Then what could have been the motive-other than the patriotic conviction that they must be performed, the obligations of their oath redeemed?

The change wrought in the body politic from that day to this is marvelous. Through the

cornery to their purity? Not a bit of it. A core that has been taken distinguished member of the United States senare stated incomivocally less than a fortuicid ago that of all the senators who coted for the league as Wilson domanded only two were genninels in facer of it. REVERSING ORLAHOMA COURTS.

to take great pleasure in reversing the state supreme court. Whether we lack lawyers on the bench or before the bar it is not given us to determine. But we could easily wish that our highest judicial tribunal might oftener be right in those cases where a federal question is involved. For the frequency of its mistakes in such cases arouses the suspicion that it is an often wrong in the greater number that never reach the supreme tribunal.

The state court stands reversed concerning the right of the state to tax Indian land allotted under tax restrictions. Most everybody who has read the early judicial history of his country knows that the question involved here was adindicated during the era giorified by the "great chief justice." How a state tribunal could get the impression that the law and logic involved in that history-making decision had changed remains a mystery.

We Oklahomana must necessarily be in sympathy with the idea of taxing all lands. We do not take kindly to the policy of maintaining a tax-free section of the electorate. But neither can we view with complaisance the violation of a vital and valuable legal principle in order to avoid such objection.

TUESDAY'S PRIMARIES.

So far as the destiny of any one of the presidential candidates is concerned the primaries of Tuesday afford no opportunity for any justy crowing. Harding in Ohio, emerges very much as did Lowden in Illinois, almost damned by the faint praise given him by his own state. Johnson showed. Hoover flivvered. In the parlance that about describes Ohio.

In New Jersey, the race between Wood and Johnson was real-again demonstrating the powerful appeal of the old Boosevelt association. Whether Wood beat Johnson or Johnson Wood is not nearly so important as the fact that the two of them combined seem to be coralling about all the republican votes not dominated by. the favorite son absurdity.

But while the primaries failed of showing a conclusive victory for any individual candidacy. we think that a reasonable analysis will demonstrate that the voters managed to convey a very marked preference as to platform. Not only within the republican party, but among democrats as well. It is admitted that the popularity. of Johnson, both east and west, is to a considerable extent because of his pronounced stand against the league. Let us look into the case of other primary results for a brief space.

GUY TRAIL Miami, April 28,

THE RESTLESS AGE

HE gray shabbiness of winter was giving way to the first flush of fresh spring loveliness. Trees and shrubs were dappled with tender -een. The farm was awakening to the magic touch of spring.

On all sides nature was stirring with hints of the fruitful richness of the months to come. Already the barnyard was simmering to the sunny music of clucking hens and peeping chicks, and before long there would be new calves and colts and puppies and pigs to add to the busy joyousness of life in the country.

A young man was standing near the door of the barn. In the lapel of his coat was a service button which told of service abroad. He was about 23 years old, and, although he had been out of the army for over a year, he still showed the clear eyed and clean cut effects of his military training.

His eyes were following the course of a distant train which was whistling for the stop at the village station. In another five minutes it would have stopped, taken on its passengers, and then moved onward toward the great city, a hundred and fifty miles to the north.

A look of restless discontent settled in the young man's eyes. His hand clenched and unclenched nervously.

"I've got to go," he muttered. "If I stick

I used to like it here on the farm, but since I came back from the other side the place seems deadly monotonous." His eyes turned toward the comfortable old

farmhouse, surrounded by its cluster of big oak

"There'll be an awful kick from the folks," he thought, "especially as it's so hard to get help these days. They won't want me to leave 'em in the lurch and go to the city. But, great Scott, there's no life out here! Their idea of an eight hour day is eight hours in the forenoon and eight in the afternoon.

"Out of the ten boys who enlisted from the farms around here I'm the only one who has come back. The rest are all up in the city, having the time of their lives and making more easy money than I ever saw. They're seeing life, and as for me, the same old grind day after day."

The sound of the locomotive whistle came from the distant village. It seemed to decide him. "I'm going!" he exclaimed, "folks or no folks!"

For an instant his lip trembled. " I wonder how Emily will take it."
